14. Timing of Examination Board meetings	Annually in June and September			
15. Date of Last Periodic Review	n/a			
16. Date of Next Periodic Review	In tandem with BVetMed			
17. Language of study and assessment	English			
18. Entry Requirements	English https://www.rvc.ac.uk/study/postgraduate/poraduate-certificate-in-veterinary-clinical-studies#tab-entry-requirements Prospective students must hold the equivale of 120 specific credits at FHEQ level 6 and a further 240 specific credits (360 credits over in essential pre-clinical knowledge of anator physiology and disease processes gained for a course intended to lead to professional registration as a veterinary surgeon. Prospective students must not: • be currently registered for the BVetlet or have been previously, registered		equivalent el 6 and a dits overall) of anatomy, gained from sional	

- Advise on animal management and welfare, and safeguard human, animal and environmental health (One Health); including principles of biosecurity, food safety, risk assessment & mitigation, zoonosis and surveillance.
- Recognise, prevent and diagnose diseases and disorders of animals.
- Be able to select and interpret appropriate diagnostic tests and formulate a treatment plan; considering pain management, client financial status & patient referral when indicated.
- Develop sound clinical reasoning skills including a logical problem solving approach in order to effectively solve clinical problems and make decisions.
- Demonstrate technical and procedural competence
- Apply scientific principles, method and knowledge to clinical practice and research.
- Proficiently search for and critically analyse literature and use evidencebased medicine to influence clinical decision-making.
- Explain how knowledge of the veterinary business environment influences the practice, its team, its clients, marketing and financial management
- Communicate effectively with the public, colleagues and other professionals both verbally and in writing; including constructing and updating clinical records and correspondence, using appropriate terminology for the audience concerned.
- Explain the principles and behaviours that underpin professionalism, teamwork and ethical decision-making (judgement) and apply these in a veterinary setting.
- Engage in life-long learning and selfreflection to improve overall competence.

Assessment of learning objectives to be integrated in Rotation Assessment – see below

Be able to cope with incomplete information and effectively use information services and information technology.	
Explain fundamental scientific, pharmacological and medical principles that underpin veterinary medicine	
 Use the principles of anaesthesia to suggest and safely perform an anaesthetic plan, from carrying out an anaesthetic risk assessment through to patient recovery. 	
Understand the relationship between productivity, production systems and economics	
Individual Learning Outcomes of each IMR can be found here:

25. Teaching/learning methods	Approximate total number of hours
Lectures	N/A

Practical Classes

Work-based Assessment on Rotations

Students will be assessed in the following categories

- { Professional Activity
- { Practical Skills
- { Clinical Reasoning and application of Knowledge

A student will obtain one of the following grades in each category

- Pass
- Fail

Students receiving one or more "Fail" in any rotation will also be considered to have failed the rotation. All core and track rotations must be passed before a student can proceed to take BVetMed finals examinations.

The types of knowledge, skills, attitudes and behaviours that will result in different marks being given during rotations are summarised in the table on page 9.

Cause for Concern

If the clinical team have concerns regarding the overall performance of a student, but do not feel these concerns warrant a fail grade in any of the three disciplines, they are at liberty to record a "Cause for Concern" notification.

27. Feedback

Describe how and when students will receive feedback, individually or collectively, on their progress in the course overall:

Feedback and Recording of Grades

During each rotation, students will receive ongoing informal feedback on their progress and performance in the three areas of: 1) knowledge and problem solving, 2) professional activities and 3)practical skills. At the end of each rotation, students will receive grades and written feedback on their performance throughout the rotation.

Generally, this will be delivered verbally towards the end of the week and the grades entered into Gradebook before the middle of the week following completion of the rotation. For certain rotations, timing of activities will prevent the delivery of face to face feedback. For those rotations, grades and formal feedback will be entered in Gradebook before the middle of the week following completion of the rotation.

On all occasions when students are adjudged to have failed a component of the rotation or their performance has been deemed to be of "cause for concern" a summary of the feedback and reasons for the grade will be logged and recorded on Gradebook. Students can use the Gradebook tool to review and reflect on their grades at any time.

28. Programme structures and requirements, levels, modules, credits and awards

	Module Title	FHEQ Level	Credits	Compulsory or optional
Year 1 (48 weeks)	Intramural Rotations	7	N/A	Compulsory
29. Work Placement Requirements or Opportunities		In tande	m with the fi	nal year of
